EXPERIENCE

Roommate Finder

June 2026

Software Engineer

- Engineered a full-stack Android application using **Java** and **Firebase** to match university students based on lifestyle compatibility.
- Architected secure user authentication and profile management systems leveraging **Cloud Firestore** for real-time data synchronization.
- Implemented a robust search filter system allowing users to refine potential roommates by personality traits and specific interests.

Fruit Ninja

May 2026

Game Developer

- Programmed a VR recreation in **Unity** using **C#**, incorporating custom physics-based slicing and collision detection mechanics.
- Designed intuitive UI workflows and integrated the **XR Interaction Toolkit** to enhance immersive, high-performance player interactions.
- Optimized game performance by managing object pooling for spawned fruit and particle effects to ensure a smooth 90 FPS experience.

K-Pop Group Explorer

January 2026

Software Engineer

- Constructed a dynamic Android application featuring a custom **ArrayAdapter** for personalized user ratings and data navigation.
- Optimized object-oriented state management using **Parcelable** objects to ensure seamless UI responsiveness across screen orientations.
- Developed responsive XML layouts to provide a consistent user experience across various device screen sizes and aspect ratios.

LEADERSHIP & ACTIVITIES

NYU CS4CS

July 2026

Participant

- Collaborated in a competitive cohort to master cybersecurity fundamentals, including network defense and cryptographic protocols.

Girls Who Code

September 2023 — Present

Big Sister Coordinator

- Manage a mentorship program pairing 4 upperclassmen with 80 underclassmen to foster relationships, provide guidance, and boost retention.
- Lead technical workshops and sisterhood initiatives to encourage confidence, communication, and leadership among female students.

TECHNICAL SKILLS

Languages: Java, Python, C#

Frameworks/Technologies: Firebase, Android SDK, Unity XR Interaction Toolkit, Cloud Firestore

Tools: Android Studio, Unity, Visual Studio Code

EDUCATION

South Brunswick High School

2027

GPA: 4.33/4.00 | SAT: 1550

- Relevant Coursework:** AP Calculus BC, AP Statistics, AP Computer Science A, Mobile App Development, VR & Game Design, AP Cybersecurity
- Honors:** Computer Science, Spanish, and National Honor Societies; AP Scholar; High Honor Roll.
